SAFETY PRECAUTIONS

Personal protective equipment: always use personal protective equipment while handling the product.

Hand protection: No requirements under normal use conditions. In case of prolonged exposure, wear protective gloves (BS EN ISO 374).

Eye and face protection: No requirements under normal use conditions. If there is risk of splashing into eyes, wear safety glasses with side shields (BS EN ISO 16321-1:2022/A1:2025).

Skin protection: No requirements under normal use conditions. With excessive exposure wear protective working clothing (overalls and boots). Cotton protective clothing and shoes that cover the entire foot (EN ISO 20345:2022).

Respiratory protection: Not needed under normal use and adequate ventilation.

Storage: Keep in a cool, dry and well ventilated place. Protect from open fire, heat and direct sunlight. Keep away from food, drink and animal feeding stuffs.

Personal hygiene measures: Use good personal hygiene practices – wash hands at breaks and when done working with material. Avoid contact with skin, eyes and clothes. Do not eat, drink or smoke while working. Do not breathe vapours/aerosols.

EMERGENCY PROCEDURES

Methods for cleaning up: Small amounts <1L: dilute with water, then clean with a sponge or collect using absorbent, inert material, and collect in an appropriate container. Clean contaminated area with plenty of water. Prevent release into the sewer, water, basements or confined areas.

Appropriate extinguishing agent: Carbon dioxide. Dry chemical powder. Water spray. Alcohol resistant foam. Product itself is not flammable.

Warn others!: See: local Fire safety plan

Provide first aid!
Protect yourself. Do not inhale gas/smoke/vapours/mist.
After an accident, wait for the superior's or the fire-fighter's permission to re-enter the work area.

Inform superiors!

SYMPTOMS OF INTOXICATION/OVEREXPOSURE

Inhalation: Not likely. Excessive exposure to spray mist, fog, or vapours may cause respiratory irritation.

Skin contact: No symptoms are expected. Contact with skin may cause irritation (redness, itching).

Eye contact: Contact with eyes can cause irritation (redness, tearing, pain).

Ingestion: Accidental ingestion: No symptoms are expected. If larger quantities were ingested: May cause abdominal discomfort.

DESCRIPTION OF FIRST AID MEASURES

Inhalation: Remove patient to fresh air - move out of dangerous area. Keep at rest in a position comfortable for breathing. If symptoms develop and persist, seek medical attention.

Skin contact: If symptoms develop and persist, seek medical attention.

Eye contact: Immediately flush eyes with running water, keeping eyelids apart. If irritation persists, seek professional medical attention.

Ingestion: Rinse mouth thoroughly with water. Never give anything by mouth to an unconscious person. Consult a physician. Show the physician the safety data sheet or label.

WASTE DISPOSAL CONSIDERATION

Waste disposal: Do not allow product to reach drains/sewage systems. Disposal must be made according to official regulations: deliver it to authorised collector/remover/transformer of hazardous waste.

Disposal of the contaminated packaging: Deliver completely emptied containers to approved waste disposal authorities. Respect internal waste disposal instructions.
